

PUCK THE NO-COMPROMISE OFFSHORE POCKET CRUISER

In PUCK we have provided more space than any offshore pocket cruiser. She looks, feels and gives you the space of a much larger yacht, with a full 6'1" headroom, an all round view of the exterior and good ventilation. The keel is well cut away forward and, with the board, gives good windward performance and ease of handling. Ample free board gives good reserve buoyancy and reserve stability when heeled.

PUCK's waterline is quite long and will allow relatively high average speeds on passage. She's built to take the worst, yet with a quality of finish on view in every detail. Seven opening ports and a large overhead hatch, marine approved seacocks, a Lavac vacuum toilet and an optional shower, an oilskin locker, a hanging locker and two book shelves, a full size chart table with room for instruments and radio equipment, shelves and cabinets and a sparkling gourmet galley offering a gimble two burner Taylor with grill, a brass lever pump and sink, a fridge and spacious storage lockers.

Choice of outboard or inboard auxiliary power and a built in protection against lightning. Easily trailed by the larger family car, she can extend your cruising grounds and winter at home.

With her large cockpit, PUCK is an elegant, very strong, affordable cruising yacht for weekend sailing with up to six people or world cruising for the small family.

She will give you undeniable comfort and unqualified performance. Her traditional appearance will also stand the test of time, and she is offered as a gaff cutter or as a Bermudian sloop. The traditional bowsprit can be replaced by an American bowsprit with balcony and anchor post.

PUCK is a must-see boat for anyone searching for a real offshore cruiser.
